VISUAL SCHEDULES... DEMYSTIFIED!

Thursday, October 17, 2024

8:30 - 3:00 (All Day)

Presented by Margaret Wood, MA-CCC-SLP and TAP Consultant

Visual scheduling is an evidence-based (and under-utilized) systematic technique that enhances learning and communication for individuals with autism spectrum disorder (ASD) *and other needs*. Students with ASD often have difficulty attending to and processing lengthy verbal requests. However, research reports that these students attend to visual information more successfully, significantly increasing positive outcomes academically and behaviorally in all settings and levels.

During this workshop, we will demystify the implementation of visual schedules in all settings.

The answers to the following questions will be revealed

and you are sure to leave with practical and effective tools that you can apply today!

- ✚ WHO would benefit? (SPOILER ALERT... ALL AGES AND STAGES!)
- ✚ WHAT types? Object, Picture, Text, Electronic -- whole class vs. individual; static vs. portable
- ✚ WHEN are visual schedules most effectively used?
- ✚ WHERE can I find FAST, FREE, and FABULOUS resources?
- ✚ WHY & HOW to create developmentally appropriate tools? (preschool, elementary, secondary+)
- ✚ WHICH visual schedules are the easiest and most cost-effective to make?

A survey will be posted in the zoom chat box at the end of the presentation. You must complete the Survey to receive your Certificate of Completion.
