

SENSORY PROFILE™ 2

WINNIE DUNN
PhD, OTR, FAOTA

Evaluate children's sensory processing patterns
at home, school, and in the community

OVERVIEW

Standardized forms completed
by caregivers and teachers
to assess children's sensory
processing patterns.

Age Range:
Birth–14:11

Completion Time:
5–20 minutes

Qualification Levels:
B

Administration:
Paper-and-pencil or
online administration

Scoring Options:
Q-global® *web-based)
or hand-scoring

Other Languages:
Spanish

Publication Date:
2014

ALSO AVAILABLE

Adolescent/Adult Sensory Profile.

A self-questionnaire for
ages 11 and older
now available on Q-global.

ENHANCE PARTICIPATION USING PERSONAL STRENGTHS

The Sensory Profile™ 2 family of assessments provides you with standardized tools to help evaluate a child's sensory processing patterns in the context of home, school, and community-based activities. These significantly revised questionnaires evaluate a child's unique sensory processing patterns from a position of strengths, providing deeper insight to help you customize the next steps of intervention. The forms are completed by caregivers and teachers, who are in the strongest position to observe the child's response to sensory interactions that occur throughout the day.

SENSORY PROFILE 2

USES & APPLICATIONS

The Sensory Profile™ 2 helps you:

- Identify and document how sensory processing may be contributing to or interfering with a child's participation at home, school, and the community.
- Contribute valuable information to a comprehensive assessment of the child's sensory strengths and challenges in context.
- Develop effective treatment plans, interventions, and everyday remediation strategies.

CONTENT & ADMINISTRATION

Using paper-and-pencil or online administration, caregivers and teachers report on the child's response to sensory events throughout the day using the relevant form(s):

- **Infant Sensory Profile 2:** Caregiver questionnaire for babies from birth–6 months.
- **Toddler Sensory Profile 2:** Caregiver questionnaire for toddlers ages 7–35 months.
- **Child Sensory Profile 2:** Caregiver questionnaire for children ages 3–14 years.
- **Short Sensory Profile 2:** Caregiver questionnaire for children ages 3–14 years. Items on this questionnaire, which are drawn from the Child Sensory Profile 2, are highly discriminating and provide quick information for screening and research programs.
- **School Companion Sensory Profile 2:** Teacher questionnaire for students ages 3–14 years.
- **Spanish Caregiver Forms:** Caregiver questionnaires for Infant, Toddler, Child, and Short in paper-and-pencil or online format.

Each form includes some combination of Sensory System, Behavioral, and Sensory Pattern scores:

- **Sensory System scores:** Auditory, Visual, Touch, Movement, Body Position, Oral.
- **Behavior scores:** Conduct, Social-Emotional, Attentional.
- **Sensory Pattern scores:** Seeking, Avoiding, Sensitivity, Registration.
- **School Factor scores:** School Factor 1 (Supports), School Factor 2 (Awareness), School Factor 3 (Tolerance), School Factor 4 (Availability) (School Companion Sensory Profile 2 only).

SCORING & REPORTING

- Sensory Profile 2 is available on Q-global®: Pearson's web-based administration, scoring, and reporting system. It enables you to quickly assess and efficiently organize examinee information, generate scores, and produce accurate, comprehensive reports—anywhere, anytime, on any web-enabled device.
- **Assessment and Planning Report:** To link the findings from the questionnaires to participation at home, in school, and in the community.
- **Multi-rater Report:** Facilitating sensory processing assessment in context.
- **Manual entry:** Option to use paper forms to administer the questionnaires, then use the Q-global system to score and generate reports.

FEATURES & BENEFITS

- Combined questionnaire and score forms, no need to purchase separate forms.
- Expanded age range in one kit—The Child, Short, and School Companion forms age increased to 14:11, giving you more flexibility in assessing preteens and younger teens.
- Shorter questionnaires—The Infant, Child, School Companion, and Short form caregiver and teacher questionnaires are briefer. The Toddler questionnaire increased by just a few items, reflecting increased understanding of sensory processing at this age.
- Updated content and greater item consistency between forms.
- No need to purchase separate kits with Infant, Toddler, Child, Short, and School Companion forms combined in to one manual.
- Provides cuts scores with optional percentiles for an additional level of analysis.
- More convenience with online or paper-and-pencil administration and scoring to fit with your workflow.
- Wide range of studies between children with and without disabilities to ensure discrimination with vulnerable populations.
- Enables theory-based decision-making because principles of neuroscience, sensory processing, strengths-based approaches, and ecological models are imbedded in the items and scoring structure.
- Presents a comprehensive view of a child's responses across settings, which helps facilitate discussion between families and professionals about strategies that support the child's participation in all contexts.
- Enhanced reporting options to link findings from the questionnaires to participation at home, in school, and the community.
