

Leading the way
SINCE 1995

CES Simplify procurement.
Maximize results.

ONE OF THE
AMERICA'S FASTEST
GROWING COMPANIES
by Financial Times

Smarter Facilities Start with Smarter Energy Decisions

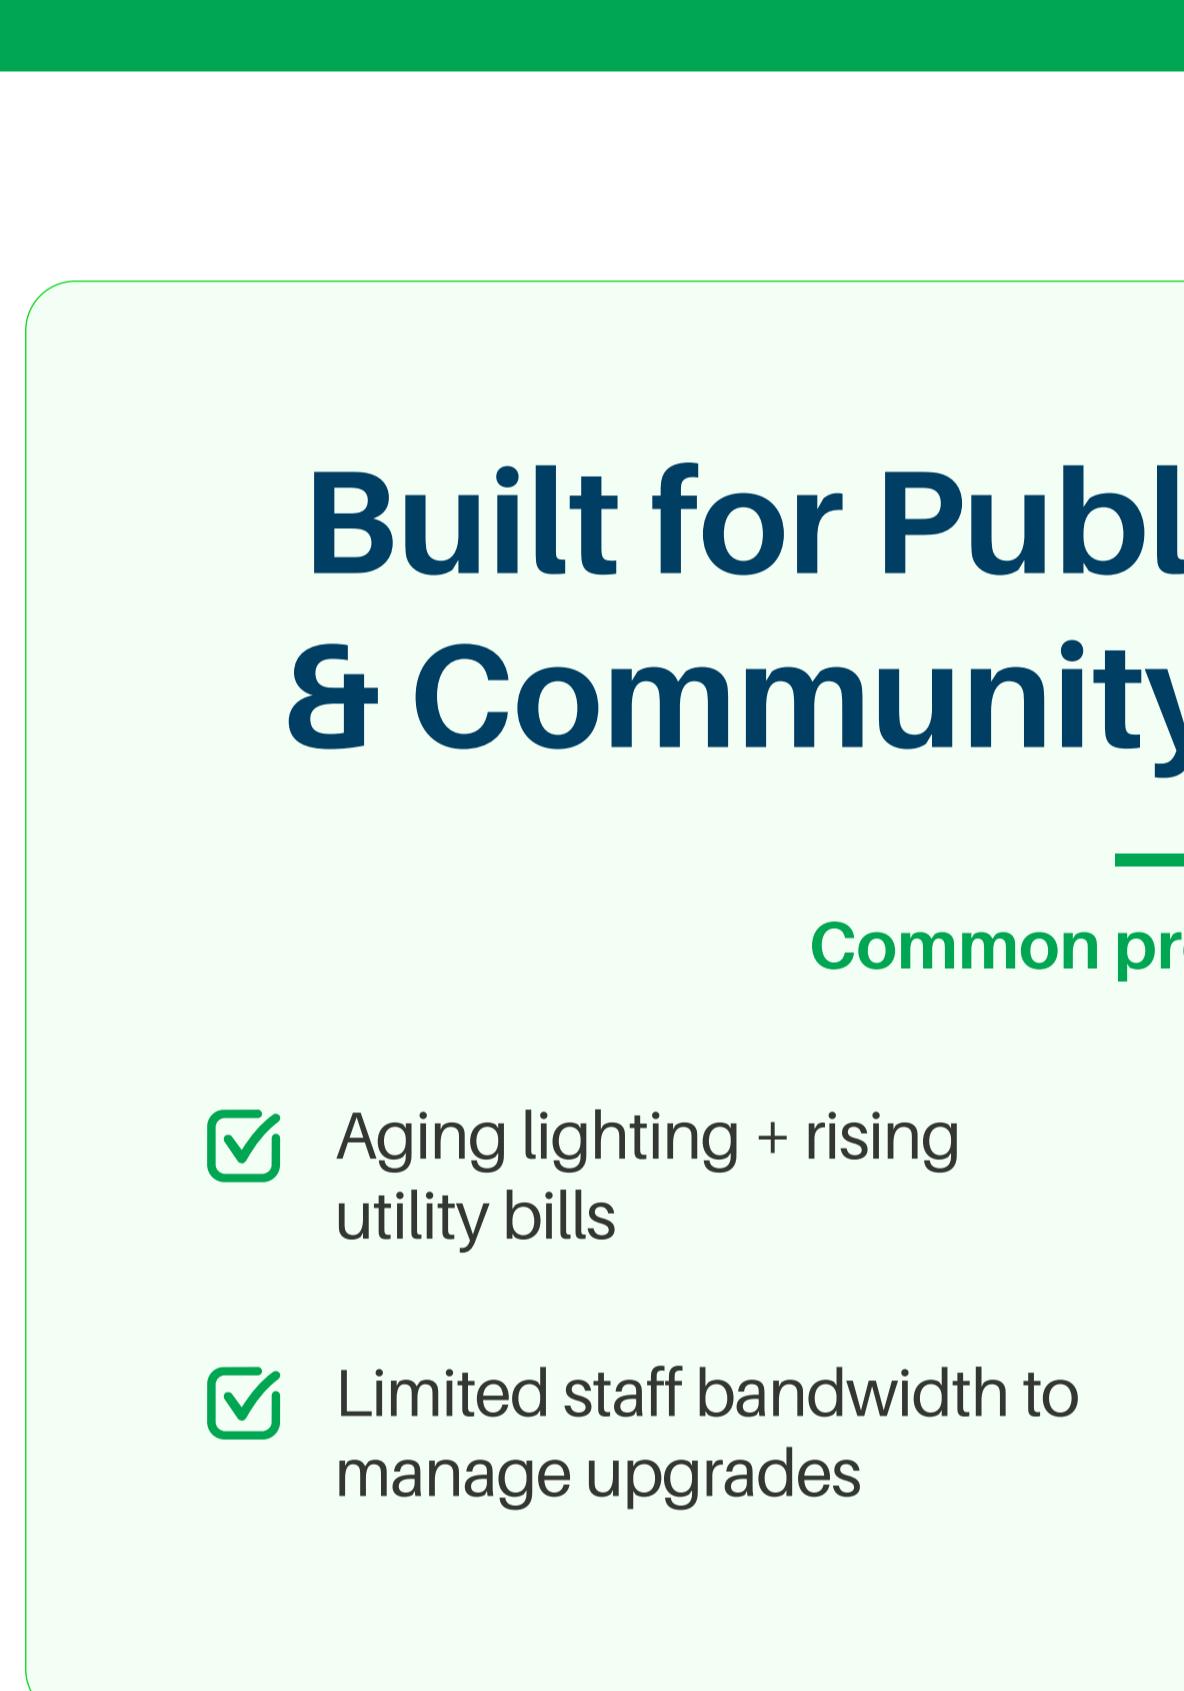

Energy costs rise. Budgets don't.

IKIO helps public and community organizations cut waste, upgrade lighting performance, and plan facility improvements with clarity—without turning it into a time-consuming project.

- ✓ Reduce energy + maintenance burden with modern LED systems
- ✓ Improve visibility, safety, and consistency across key spaces
- ✓ Make upgrades easier to plan, approve, and execute

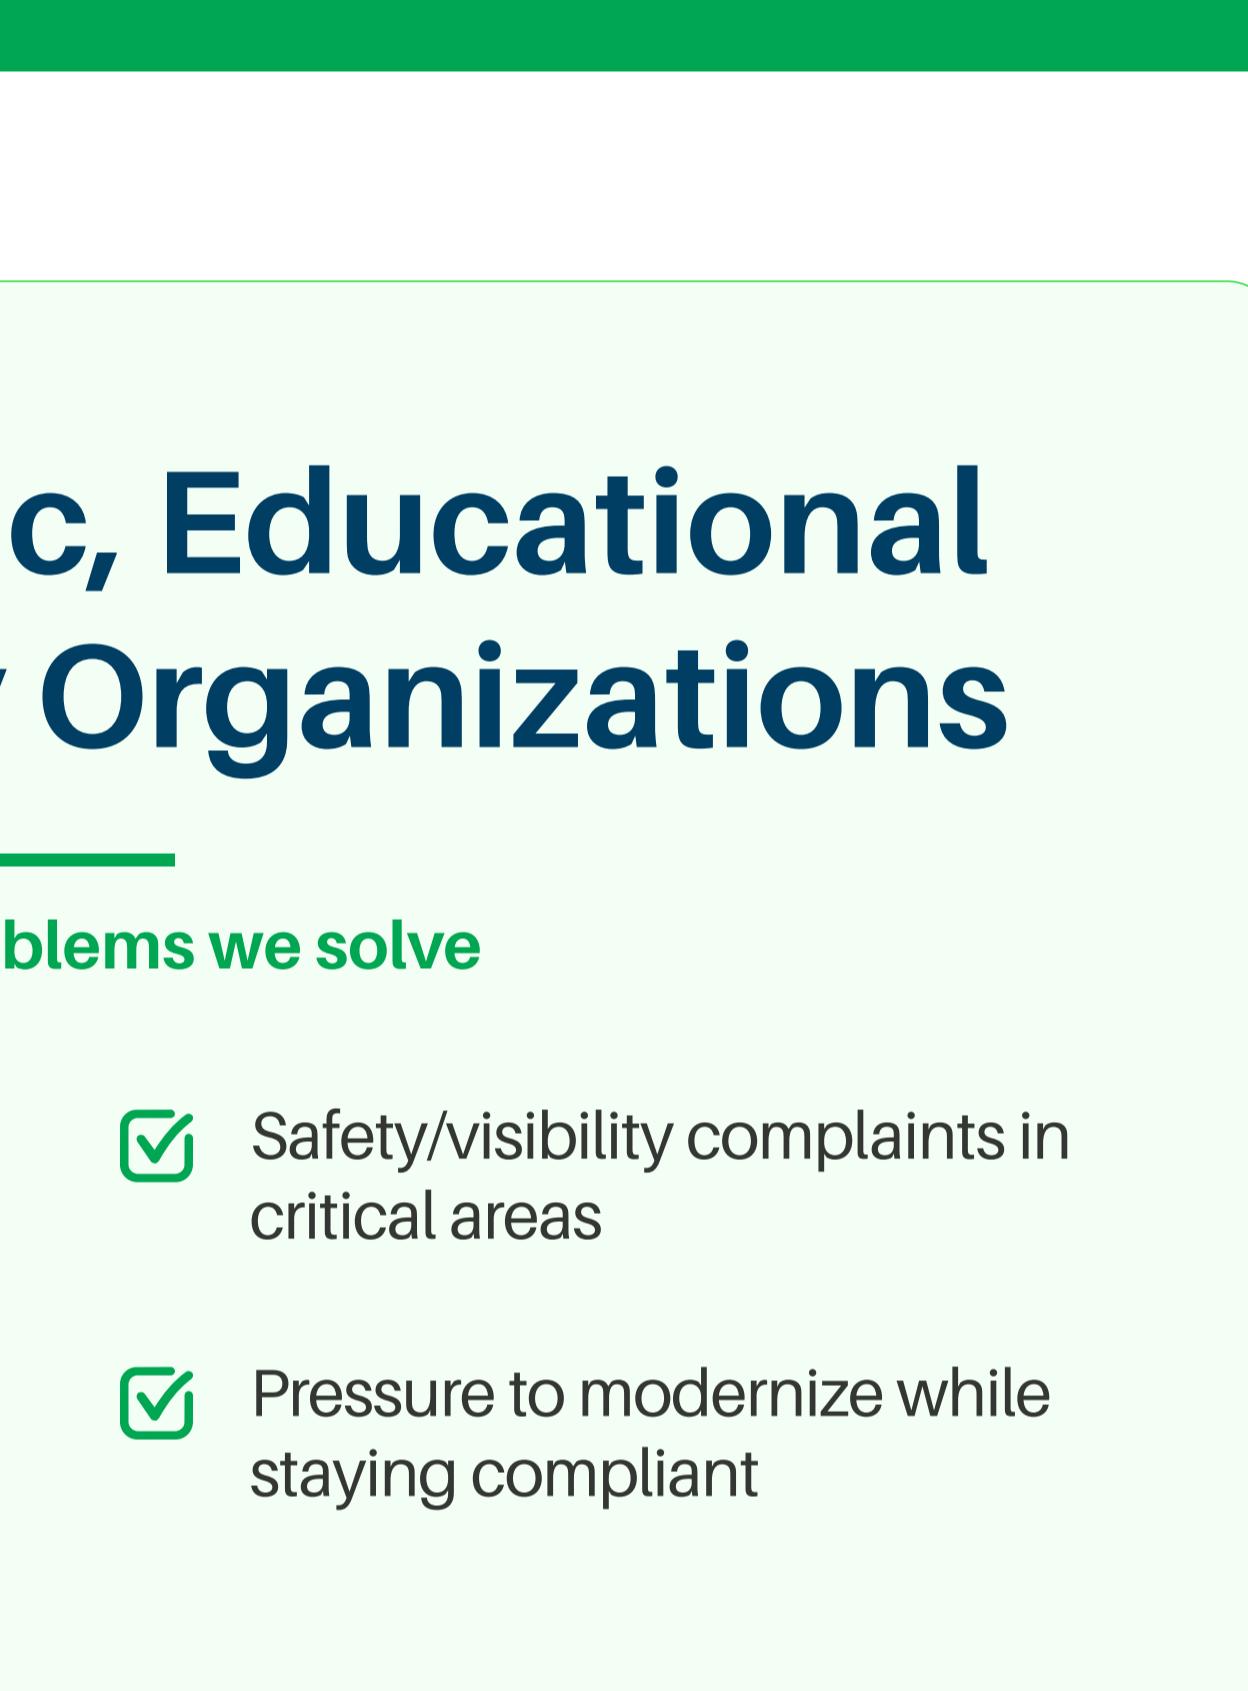

IKIO doesn't just sell upgrades — the team helps fund and execute them responsibly.

Proven Results Across Public & Community Facilities

Texas Districts:

IKIO supported multiple districts in securing upgrade funding and delivering compliant, high-performance installations

Built for Public, Educational & Community Organizations

Common problems we solve

- Aging lighting + rising utility bills
- Safety/visibility complaints in critical areas
- Limited staff bandwidth to manage upgrades
- Pressure to modernize while staying compliant

One partner that manages the full upgrade path

More Than an Upgrade - A Smarter Way to Fund It

IKIO doesn't just design and install energy upgrades.

We help schools and facilities find the right funding paths, align projects with grant and rebate requirements, and use those dollars strategically so energy goals are achieved without disrupting primary missions or budgets.

See Your Savings Before You Spend a Dollar

Complimentary Energy Savings Pre-Assessment (No cost. No commitment.)

Get a clear picture of potential savings and upgrade opportunities before making any decisions.

Early savings insight (what's possible + where it's coming from)

Qualification checks for a full assessment

Recommended "next best steps" you can act on

As part of our Indiana-based initiative, IKIO collaborates with a local university to give electrical engineering students hands-on experience, so your pre-assessment helps support future engineers too.

Funding-Ready. Audit-Ready. Compliance-Ready.

Upgrades often stall because funding rules and documentation get complicated.

IKIO keeps it simple.

Support you can rely on:

- ✓ ASHRAE Level 1 & 2 audits to support rebate and funding eligibility
- ✓ DLC + BAA + BABA compliance for grant-ready projects
- ✓ Guidance aligning project scope with available incentives and program requirements (state + federal)

Upgrades often stall because funding rules and documentation get complicated.

IKIO keeps it simple.

Let's Talk About Your 2026 Energy Strategy

January is planning season. If 2026 upgrades are on your horizon, the best time to start is before funding windows and budget timelines get tight.
